At the completion of this course you should be able to:

- understand the **Word** object model and **VBA** concepts
- work effectively with the main features of the **VBA Editor** window
- create procedures in **VBA**
- create and use variables
- create and work with user-defined functions
- use programming techniques to control the action taken by your program
- construct loops that repeat code according to different requirements
- identify and select specific text using code modules
- create and use code to undertake basic file management tasks
- create code to drive a user form
- write a variety of error handling routines
- use **VBA** code to display and use **Word's** built-in dialog boxes

### ❖ Prerequisites

Programming In VBA - Using Microsoft Word 2013 assumes a good working knowledge of the software. The learner should be able to create and edit different kinds of documents and must also have a general understanding of personal computers and the Windows operating system environment and be able to use File Explorer to locate and copy files.

### ❖ Topic Sheets

148 topics

### ❖ Methodology

The InFocus series of publications have been written with one topic per page. Topic sheets either contain relevant reference information, or detailed step-by-step instructions designed on a real-world case study scenario. Publications can be used for instructor-led training, self-paced learning, or a combination of the two.

### ❖ Formats Available

A4 Black and White, A5 Black and White (quantity order only), A5 Full Colour (quantity order only), Electronic Licence

### ❖ Companion Products

There are a number of complementary titles in the same series as this publication. Information about other relevant publications can be found on our website at [www.watsoniapublishing.com](http://www.watsoniapublishing.com).
