This is a beginner’s course and aims to give the new spreadsheet user a thorough grounding in the basics of creating and working with spreadsheets using Microsoft Excel 2016. Particular emphasis is placed on developing accurate and well-designed spreadsheets employing sound design and documentation principles.

At the completion of this course you should be able to:

- navigate your way around Microsoft Excel 2016
- create and work with a new workbook
- open and navigate within workbooks and worksheets
- make changes to data in a workbook
- understand and work with ranges in a worksheet
- copy and paste data in Excel
- use the fill operations available to fill a data series
- move the contents of cells and ranges within and between workbooks
- understand, create and work with formulas and functions
- understand and use formula cell referencing
- use font formatting techniques
- align the contents of cells in a number of ways
- understand and use the number formatting features in Excel
- format rows and columns in a worksheet
- work with elements that make up the structure of a worksheet
- sort data in a list in a worksheet
- filter data in a table
- print your workbook data
- create effective charts in Microsoft Excel
- obtain help for Excel whenever you need it
- understand points to consider to avoid problems in your worksheets

This course assumes little or no knowledge of spreadsheets or Microsoft Excel 2016. However, it would be beneficial to have a general understanding of personal computers and the operating system environment, especially in regard to working with files and folders.
