The skills and knowledge acquired in Microsoft Excel 2016 - Functions are sufficient to be able to use a variety of Excel functions, including logical functions, math functions, date and time and financial functions. It is a reference manual and is designed to be used by someone already familiar with how functions are used in Excel.

At the completion of this course you should be able to:
- use logical functions to test whether a statement is true or false
- use a range of lookup and reference functions
- use maths functions to solve complex problems
- use a variety of statistical functions
- use a variety of financial functions to perform calculations
- use the date and time functions to perform calculations
- use a range of text functions
- use a range of information functions to test worksheet data

Microsoft Excel 2016 - Functions assumes some knowledge of Excel, including an understanding of how functions are used.
